## SPL-8

**Kelsey SPL** is a purpose-built range of professional speaker cables designed for use in the touring, hire and theatre sectors. The high-endurance polymer jacket offers excellent abrasion-resistance and impact protection while maintaining the internal core structure without kinks or twists. Core stranding is optimised for flexibility and high- frequency conductivity without compromising reliability or ease of termination. Each oxygen-free stranded copper conductor offers minimal resistance and low capacitance, with individual core jackets colour-coded for fast identification.

Built for optimum handling and electrical performance, **SPL** is one of the most flexible and easy to rig (even in cold conditions) professional speaker cables on the market.
